Task # 1

#grade for student

Print ('Please, input the students grade out of 100.')

```
grade=g
if g=90 or >90
 print ('A')
else g= 89 to 80
 print ('B')

if g=79 or >70
 print ('C')
else g= 60 to 69
 print ('D')

if g=<60
 print ('F')
```

Task #2

Create a word game based on the starter program that produces a version of Pig Latin game.
Elevate the program to include a description, game rules and allow the user to exit the program when desired.

You may change the program to make it more interesting to generate new word combinations.
A method that checks for numbers in a string such as isdigit() method.

Base program model
